Rosemont Copper Project EIS
Coronado National Forest
300 W. Congress St
Tucson, AZ 85701

Hi,

My water is pumped from well number 55-519879. I would like to know what impact the Rosemont mine will have on my well. Can I expect the water table to be lowered? If so will my well run dry? If my well runs dry, who will pay to get water to my home? What do you estimate the future groundwater table depth to be? What guarantees do we have, if My wells go dry or is polluted as an indirect impact of the mine? What will Augusta do to guarantee I have water, and how long will the guarantee last. If the mine closes are there going to be funds put in a trust to cover the expense of having a well dug deeper, if the well no longer produces water is Augusta going to pipe or truck water to me, and what quality will the water be because right now I have EXCELLENT water. My home is worthless if I don't have water. Where will the water come from if they agree to supply me. How will they determine the amount of money that would be set aside in case this occurs.

Thank you for answering these questions.

Sincerely

Chuck Woodford
